

# CDS Liquid Chlorinator Instruction Sheet (Product 3135G)

Congratulations on choosing the CDS Liquid Chlorinator (Product 3135G) for your swimming pool water disinfection needs! This instruction sheet will guide you through the safe and effective use of our product.

## Safety Precautions

Wear protective gloves, goggles, and a face mask when handling the product. Ensure the area is well-ventilated and avoid inhaling the product's fumes. Keep the product out of reach of children and pets.

## Installation

**Mounting:** Install the product near the pool equipment area, ensuring easy access for maintenance and monitoring.

**Connection:** Connect the product to the pool's circulation system, following the manufacturer's instructions.

## Operation

**Initial Dosing:** Add the recommended dose to the pool water, based on the pool's volume and chlorine demand.

**Continuous Dosing:** Set the chlorinator to maintain a consistent chlorine residual of 1-3 ppm.

**Monitoring:** Regularly test the pool water for chlorine residual, pH, and other parameters to ensure optimal disinfection and water balance.

## Maintenance

**Cleaning:** Regularly clean the chlorinator's injection valve and strainer to prevent clogging.

**Replacement:** Replace the product's seals and gaskets as recommended by the manufacturer.

## Troubleshooting

**Low Chlorine Residual:** Check the chlorinator's dosing rate, injection valve, and strainer for blockages.

**High Chlorine Residual:** Reduce the dosing rate or adjust the chlorinator's output.

## Product Specifications

**Product 3135G:** 4x1 gallon/case; 48 cases/pallet; sold by the case.

*Always refer to the manufacturer's documentation and local regulations for specific guidelines and recommendations.*

*Happy pool maintenance!*
