

# #725

## Total Solutions RUST CONVERTER 12X1 QT/CASE

# 1<sup>ST</sup> LAYD

Rust Converter covers rust with a hard, black, corrosion-resistant seal providing a durable barrier against rust. No need to clean steel surfaces to bare metal saving you time and labor. Use as a corrosion barrier on new steel. Paint directly over treated surfaces with no prep or priming.

- Water based product.
- Non-flammable.
- No hazardous fumes.
- Cleans up easily with soap and hot water.
- Works on rusty iron or steel.

Caution: 725 will bleed through water based paint.

### Directions

- Apply 2 coats
- Allow 20 minutes of drying time between coats
- Allow 48 hours curing time
- One gallon covers 500 square feet
- **Tanic acid** reacts with iron oxide (rust) chemically converts to iron tannate . Turns to a protective polymeric coating
