DRILL BITS & TOOL ACCESSORIES

Norseman Drill Bit Set

Designed for drilling work-hardening stainless steel and other hard metals. Mechanic-length Type 175-AG bits feature a 135° split point for accurate starting without a center punch. Heat-treated, nitro-carburized steel resists heat and stays sharp. Gold finish improves lubricity for smoother drilling.

4000	Type 175-AG (Metal Case)	1/16" to 1/2"	29 bits	Set
4003	Type 175-AG (Round Plastic Case)	1/16" to 1/2"	29 bits	Set

4003

4005

Vortex Drill Bit Set

Vortex point has a step drill design for durability and heat reduction increasing the life of the drill bit. 3-flats on shank eliminates slippage. Mechanics length construction creates sturdier bit. Split-point design eliminates use of center punch. For use on: Cast Iron, hard steel, mild steel, sheet metal, brass, copper, and acrylics.

4007	Red Plastic Round Case	1/16" to 1/2"	29 bits	Set

Norseman Duplex Blue Drill Bit Set

Duplex Coating gives superior wear resistance. Extreme tool life vs other drills. Enhanced surface hardness. Duplex PVD coatings resist degradation & thermal breakdown allowing the tool to stay sharp and continue cutting long after normal drills have worn out. Multiple layers create a super smooth finish that reduces the possibility of Galling & gives extreme tool life in aluminum applications. Comes in a red plastic round case.
