

# THE SOLUTION: GAS-RX™

**GAS-RX™** is the all-season hi-tech treatment and conditioner that eliminates the harmful effects of water contamination in all 2 and 4 cycle engines! **GAS-RX™** is an organic based, powerful fuel system stabilizer and cleaner, that helps prevent E-10 fuel phase separation.

**GAS-RX™** improves fuel efficiency, increases power, reduces emissions and engine wear. This powerful multi-purpose formula dissolves gum, varnish, and carbon deposits that distort fuel injector spray patterns and damage delicate fuel system components. **GAS-RX™** contains no harmful alcohols, or emulsifiers, and allows your engine to operate with all the power and efficiency of its original design.

## EVERTECH LABS™ GAS-RX™

- ✓ Increases Power and Performance
- ✓ Improves Fuel Economy and Reduces Emissions
- ✓ Removes Gums, Varnishes and Carbon Deposits
- ✓ Prevents Phase Separation in E-10 Gasoline
- ✓ Aids combustion in older gasoline's
- ✓ Stabilizes Fuel up to 2 Years
- ✓ and much more...

### TESTIMONIALS

#### HARLEY MOTORCYCLE

After Using Gas-RX my 2004 Harley FLHTCU1 started easier, ran smoother and my gas mileage went up 4 mpg.  
- Ralph C. - NY  
(Reported by Matt Service Manager Jamestown Harley)

#### GENERATOR

My backup generator was stored in my garage with 3 year old gas. Once I got it started the engine was running rough. I treated with Gas-RX and a few minutes later my engine was running smooth.  
- Mike H. - NY

#### CHAINSAW

My chainsaw wouldn't run after storing it over the winter. This forced me to take the carburetor apart to clean out the gum and deposits. I put it back together only to find that now it starts, but it runs very rough. I decided to try Gas-RX to find that after just a few minutes of running the engine smoothed out and idled down. Now it starts on the first pull.  
- Tom C. - NC

# THE PROBLEM: ETHANOL IN GASOLINE

## CORROSION AND CLOGGING

Engine Manufacturers have pointed to ethanol in gasoline (E-10) as the source of some engine problems such as corrosion, fuel pump failures, and clogging of carburetors, injectors, and fuel filters. Ethanol blended gasoline also burns with less energy causing engine deposits, poor fuel economy, and rough running engines.

## WATER AND PHASE SEPARATION

Ethanol naturally increases the octane and oxygenates in gasoline, which is good, but it will also absorb up to .5% water from the atmosphere. This dissolved water in gasoline can cause corrosion concerns in fuel systems, most notably in seasonal/recreational equipment. When dissolved water exceeds .5%, or the temperature drops, phase separation will occur. Phase separation dramatically lowers the octane and oxygenate levels in fuels resulting in very poor running engines, O2 sensor/catalytic converter failures, and serious engine damage.

## STABILIZATION

Gasolines containing ethanol can breakdown and become stale in as little as 60 days, and will very quickly form deposits causing rough running and hard starting engines. Gasoline must be stabilized.

Most markets today carry E-10 Gasoline, so protect your tools and toys with Gas-RX by Enertech Labs.

**For Maximum Protection and Smoother Performance, Depend on Gas-RX**

# YOUR PRESCRIPTION FOR ETHANOL-BLENDED GASOLINE

THE ALL-SEASON, HI-TECH TREATMENT AND CONDITIONER THAT ELIMINATES THE HARMFUL EFFECTS OF WATER CONTAMINATION IN ALL 2 AND 4 CYCLE ENGINES!

## KEY BENEFITS

- Removes water from ethanol gasoline and prevents corrosion
- Prevents phase separation in E-10 gasoline
- Stabilizes and conditions gasoline with no harmful alcohols or emulsifiers
- Improves starting, performance, fuel economy, reduces emissions, and produces a smoother idle
- Cleans the entire fuel system, carburetors, fuel injectors, dissolves gums, varnishes and carbon deposits
- Can be used in all 2 and 4 cycle engines
- Super concentrated — 2 oz. treats up to 15 gallons

Don't allow your equipment to let you down. Protect your tools and toys with **Gas-RX**. Adding **Gas-RX** to your engine's "diet" improves fuel efficiency, increases power, reduces emissions, and reduces engine wear. This powerful multi-purpose formula dissolves gum, varnish, and carbon deposits that can distort fuel injector spray patterns, and damage delicate injector and fuel system components. **Gas-RX** contains no harmful alcohols or emulsifiers and allows your engine to operate with all the power and efficiency of its original design.
