

#924-5

#931-5

#925-5

	#924-5 UltraSoil-Out Laundry Detergent	#931-5 UltraChlor Chlorinated Laundry Destainer	#925-5 UltraSoft Fabric Softener
Primary Role:	Cleaning: Removes grease, oils, and heavy soils.	Bleaching: Whitens fabrics and removes organic stains.	Finishing: Softens fabrics and reduces static.
Key Ingredient:	Citrus Solvent & Surfactants	Chlorine-based formula	Specialty softening agents
Fragrance:	Fresh Floral	Chemical/Chlorine	Fresh Floral
Fabric Safety:	Safe for most washables and colors.	Whites/Colorfast only; avoid silk, wool, and spandex.	Safe for all fabric types.
Best Used For:	Breaking down tough industrial grime.	Sanitizing and removing stubborn stains/graying.	Improving comfort, reducing wrinkles, and static cling.

How to use them together:

For a complete industrial-grade laundry cycle, these products serve different stages:

- 1. UltraSoil-Out (#924-5):** Use this during the main wash cycle to pull dirt and grease out of the fibers.
- 2. UltraChlor (#931-5):** Add this as a booster to the wash cycle (for whites only) to ensure deep stains are lifted and fabrics are sanitized.
- 3. UltraSoft (#925-5):** Add this during the final rinse cycle to leave the laundry feeling soft and smelling floral.

Note: All three products are sold in 5-gallon pails and are designed for use in automatic injection systems or heavy-duty industrial machines.
